

## Another Potent Spring Storm Headed Toward Colorado

A moist and slow moving storm system currently over central California will move into the Four Corners region by late Thursday and across Colorado Friday into Saturday. This Storm will produce ample precipitation across north central and northeastern Colorado...with heavy snow in the Mountains and Foothills. As a result...a [Winter Storm Watch](#) has Been issued for those areas from Thursday evening through Friday evening. Some snow will also be possible on the Plains and Palmer Divide...however snow amounts are uncertain at this time. Stay tuned for further updates on this developing storm

## Winter Storm Watch for the Front Range Mountains and Foothills from Early Thursday Evening to Late Friday Evening

A potent spring storm system is expected to move across Colorado late Thursday and Friday.

Snowfall may be heavy at times in the mountains and foothills of north central Colorado Thursday evening through Friday evening.

Possible snow amounts by late Friday evening anywhere from 10 to 20 inches...with the higher totals on east facing slopes.

**Tree damage...power outages and winter driving conditions are possible.**
